

1) Scenario Name

Search Functionality Testing

2) Weak Prompt

"Test the search feature."

3) What I Feel is Missing

Application type is not specified.

No details about search criteria.

No filter or sorting validation.

No positive and negative test scenarios.

No performance expectations.

No output format specified.

4) Rewritten Prompt

Context: Act as a Senior Test Engineer testing the Search Functionality of an E-Commerce Web Application.

Instruction:

[MANDATORY] Generate exactly 10 test cases for Search Functionality.

[MANDATORY] Include Functional and Non-Functional scenarios.

[MANDATORY] Include Positive and Negative scenarios.

[Strict] Cover:

Search by Product Name

Search by Partial Keyword

Search by SKU/Product ID

Empty Search Validation

Invalid/Special Character Input Handling

No Results Found Scenario

Filter Functionality Validation

Sort Functionality Validation

Search Result Relevance

Search Performance Testing

Application Details:

Domain: E-Commerce

Products: Electronics, Clothing, Home Appliances

Available Filters: Category, Brand, Price Range

Available Sort Options: Price (Low to High), Price (High to Low), Popularity, Newest First

Example:

TCID | Description | Priority | Preconditions | Steps | Expected Result

TC001 | Verify search using valid product name | High | Products exist in catalog | Enter product name and click Search | Relevant products are displayed

Persona: Act as a Senior QA Engineer, Test Lead, and E-Commerce Business Analyst.

Output Format: Provide output in Excel-ready table format.

Tone: Use a professional and technical tone.

Weak prompt output:

I'm ready! Go ahead and throw a topic, question, or something you want to look up my way, and we'll put the search feature through its paces. What are we hunting for?

Observation :

The first prompt lacked domain, application, and functional context, so the AI could not determine the scope and asked clarifying questions. After providing specific e-commerce and shopping cart details, the AI generated accurate and relevant test cases.
