

**1) Scenario Name:**

Shopping Cart Functionality

**2) Weak Prompt:**

"Test the cart functionality."

**3) What I Feel is Missing:**

What Application name not specified

Domain type is not specified

Add to cart scenarios are not specified.

Remove from cart scenarios are missing.

Not detailed Scenarios mentioned

**4) Rewritten Prompt**

Context : Act as a Senior Test Engineer testing an E-Commerce Web Application.

Instruction:

[MANDATORY] Generate exactly 10 test cases for Shopping Cart Functionality.

[MANDATORY] Include Functional and Non-Functional scenarios.

[MANDATORY] Include Positive and Negative scenarios.

[Strict] Cover: Add to Cart , Remove from Cart , Update Quantity, Cart Persistence, Price Calculation, Tax and Shipping Calculation, Coupon and Discount Validation

Out-of-Stock Handling

Maximum Quantity Validation

Performance Testing

Example:

TCID | Description | Priority | Preconditions | Steps | Expected Result

TC001 | Verify adding a product to cart | High | Product available | Click Add to Cart | Product added successfully

Persona: Act as Senior QA Engineer, Test Lead , E-Commerce Business Analyst

Output format : Provide output in Excel-ready table format.

Tone : Use a professional and technical tone.

## **5)Observation**

1: the second output is more complete because it covers all required cart functionalities, while the first output only provides a general checklist.

2: The second output is easier to use for testing since it includes Test Case ID, Priority, Preconditions, Steps, and Expected Results in a structured format.

3: The second output is more professional and QA-focused, with a good mix of positive, negative, functional, and non-functional test scenarios.

## **6) Week prompt output:**

If you're testing an e-commerce cart, here is a practical test checklist:

#### ### Add to Cart

- \* Add a single item to the cart.
- \* Add multiple different items.
- \* Add the same item multiple times.
- \* Add items with different variants (size, color, etc.).
- \* Verify cart count updates correctly.

#### ### Update Cart

- \* Increase item quantity.
- \* Decrease item quantity.
- \* Set quantity to maximum allowed value.
- \* Attempt invalid quantities (0, negative, non-numeric).
- \* Verify subtotal and total recalculate correctly.

#### ### Remove Items

- \* Remove a single item.
- \* Remove all items.
- \* Verify cart becomes empty and displays the correct message.

#### ### Pricing & Discounts

- \* Verify item prices match product pages.
- \* Apply valid coupon codes.
- \* Test invalid/expired coupons.
- \* Verify taxes, shipping, and discounts are calculated correctly.
- \* Confirm totals update after quantity changes.

#### ### Persistence

- \* Refresh the page and verify cart contents remain.
- \* Log out and log back in (if applicable).
- \* Close and reopen the browser.
- \* Test cart persistence across devices for logged-in users.

#### ### Inventory Validation

- \* Add an in-stock item.
- \* Attempt to exceed available stock.
- \* Verify out-of-stock items are handled correctly.

#### ### Checkout Integration

- \* Proceed to checkout from the cart.
- \* Verify cart contents transfer correctly.
- \* Navigate back and ensure cart remains unchanged.

#### ### Edge Cases

- \* Add and remove items rapidly.
- \* Test with slow network conditions.
- \* Open the cart in multiple tabs and verify synchronization.
- \* Test guest vs. authenticated users.

#### ### Mobile & Browser Testing

- \* Verify cart functionality on mobile, tablet, and desktop.
- \* Test across major browsers (Chrome, Safari, Firefox, Edge).

#### ### Expected Result

At every step:

- \* Cart contents are accurate.
- \* Prices and totals are correct.
- \* No errors or data loss occur.
- \* UI updates immediately and consistently.

If you're testing a specific website or application, I can create detailed test cases with steps, expected results, and priority levels.

#### **7) Rewritten prompt output:**

| TCID                                                                                          | Description                                                                     | Priority                                                                                                         | Preconditions                         |
