

JIRA Integration - Using Vibe Code

The image shows two screenshots of a web application titled "User Story to Tests". The application is running on localhost:5173.

Top Screenshot: Connect Jira

The "Connect Jira" section has a sub-header: "This UI-only flow stores your Jira connection details locally and populates user stories for the form." A status message at the top right says: "Connected to https://thinkinsolutions.atlassian.net/jira/software/projects/GS/boards/78".

Fields for connection:

- Base URL:** https://thinkinsolutions.atlassian.net/jira/software/projects/GS/boards
- Email ID:** vinaykumar@thinkinsolutions.com
- Jira API Key:** [Redacted]

A "Reconnect Jira" button is present. Below the fields, a message states: "Connected to https://thinkinsolutions.atlassian.net/jira/software/projects/GS/boards/78. 3 stories are ready to use."

User Stories:

- JIRA-101:** User can sign in with email and password. The user should be able to sign in securely using a registered email and password.
- JIRA-102:** User can view and filter the project dashboard. The user should be able to open the dashboard and filter items by status and owner.
- JIRA-103:** [Redacted]

Bottom Screenshot: Test Case Form

The bottom screenshot shows a form for generating test cases from a user story. The form fields are:

- Story Title ***: User can sign in with email and password
- Description**: The user should be able to sign in securely using a registered email and password.
- Acceptance Criteria ***: Given valid credentials, the user should be redirected to the dashboard. When the credentials are invalid, an error message should be displayed.
- Additional Info**: Imported from Jira (JIRA-101) via UI-only connection

A "Generate" button is located at the bottom left of the form.

30 test case(s) generated • Model: llama-3.3-70b-versatile • Input tokens: 417 • Output tokens: 2039 • Cost: \$0.001857 (est.)

Test Case ID	Title	Category	Expected Result
▶ TC-001	Valid Email and Password	Positive	User is redirected to the dashboard
▶ TC-002	Invalid Email	Negative	Error message is displayed
▶ TC-003	Invalid Password	Negative	Error message is displayed
▶ TC-004	Empty Email	Edge	Error message is displayed
▶ TC-005	Empty Password	Edge	Error message is displayed
▶ TC-006	SQL Injection Attempt	Authorization	Error message is displayed and no unauthorized access is granted
▶ TC-007	Cross-Site Scripting (XSS) Attempt	Authorization	Error message is displayed and no unauthorized access is granted
▶ TC-008	Password Exceeds Maximum Length	Edge	Error message is displayed
